### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated U.S. Patent No. 5,711,994 to Powers.
3. Powers discloses a process for film deposition in which a film is deposited on surfaces of a substrate in a vacuum chamber (Figure 2, created by walls 137) capable of maintaining a vacuum therein (column 7, rows 33-37), which comprises a substantially vertically traveling continuous sheet as a substrate (Figure 2, 116); and continuously conducting a film deposition on the surfaces of the continuous sheet (column 7, row 45 through column 8, row 9); the film deposition being conducted substantially horizontally on the surfaces of the substantially vertically traveling continuous sheet by film depositors (128) facing each other across the continuous sheet, and the continuous sheet being a non-woven fabric having a mass of about 5 to 300 g/m<sup>2</sup> (column 6, rows 55-62).

### *Allowable Subject Matter*

4. Claims 11-12 and 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or fairly suggest a deposition process for a non-woven fabric further comprising the details that are represented in dependent claims 11-12 and 14-16. Additionally, no other piece of art

Art Unit: 1763

was located to supplement the cited prior art that fairly taught these limitations and the requisite motivation for combination.

### ***Response to Arguments***

6. Applicant's arguments, filed 22 March 2004, with respect to the rejection(s) of claim(s) 10 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Powers. Powers discloses a deposition process as claimed performed on a non-woven fabric.

7. Applicant's arguments, filed 22 March 2004, with respect to claims 11-12 and 14-16, have been fully considered and are persuasive. The rejections have been withdrawn and no new rejections were made, as the prior art does not teach or fairly suggest the method as claimed.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karla Moore whose telephone number is 571.272.1440. The examiner can normally be reached on Monday-Friday, 8:30am-5:30pm.
